

Our patented InkCenter® provides a high performance system for ink cartridge refilling designed for the retail environment. We use 27 unique premium pigments and dye inks. Our precise refill process carefully cleans, fills, and tests each cartridge to ensure quality and reliability.

CARTRIDGES

Guaranteed to deliver the same or more pages than a new cartridge

Supports over 300 HP, Canon, Epson and Brother cartridges

No field upgrades required when adding new cartridges

Zero changeover time between cartridge refills; zero ink waste on changeovers

OPERATION

Easy to operate, very little maintenance required

No system calibration required – plug-and-play

Adapter-based system for easy upgrades

RIS provided in-person and on-machine training

National support team and customer care

Proven 99.7% uptime in high volume locations

Parallel processing capability – up to 20 cartridges per hour

Active sensors monitor operations and control quality variables

Touch screen user interface with integrated video help screens

Integrated wipes dispenser provides additional worktop space

MACHINE

Uses a standard electrical outlet, 110V and 220V ready

UL/TUV certified machines

Patented ink filling technology to maximize print quality and page counts

Capacity for up to 27 unique ink formulations

No water, compressed air or drain plumbing needed

Internet connection for remote diagnostics, system monitoring and software upgrades

Robust Linux operating system

On-board storage for up to 30 liters of ink and one gallon of cleaning fluid

Integrated vacuum wand cleaning tool

**InkCenter®****FOOTPRINT**

7.5 sq. ft. footprint (36" wide x 30" deep x 52" high)

Front access for all operations & standard counter-height work surface

Heavy-duty locking casterwheels for easy moving and placement

Company Description

Retail Inkjet Solutions Inc. (RIS) is an innovative company that is passionate about finding better ways to print - while saving money for the consumer and also doing something positive for the environment. Founded in 2004, we are the global leader in on-site inkjet printer cartridge refilling technology. The multi-patented RIS InkCenter® kiosk is deployed in more than 670 participating retail locations across the United States, Canada, Mexico and Europe - including Costco Wholesale, Sam's Club, Fry's Electronics, E.Leclerc, Auchan, Metro Cash & Carry, Intermarché, WHSmith, Saturn, Maplin and select University Bookstores. RIS provides customers with unmatched printing quality while delivering savings of up to 70% over the purchase of a new ink cartridge.
